

Storage Built for Video Surveillance & Physical Security

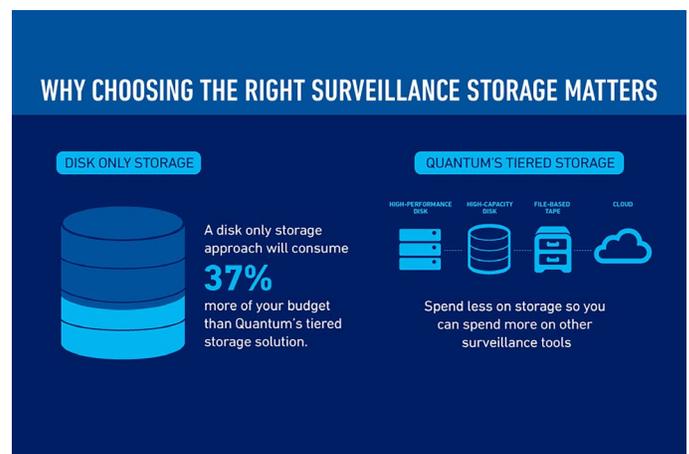

The video surveillance industry is undergoing a significant transformation—it is much more than simply observing crimes. Challenges created by more cameras, higher resolutions, and increasingly complex analytics are creating an influx in data, and managing this infrastructure takes an intelligent, scalable storage platform. Quantum's video surveillance data storage solution has the ability to tier storage, which will save you money without reducing video quality, retention time, or camera streams—allowing you to invest more in other tools needed to successfully keep people and property safe.

PERFORMANCE MATTERS.

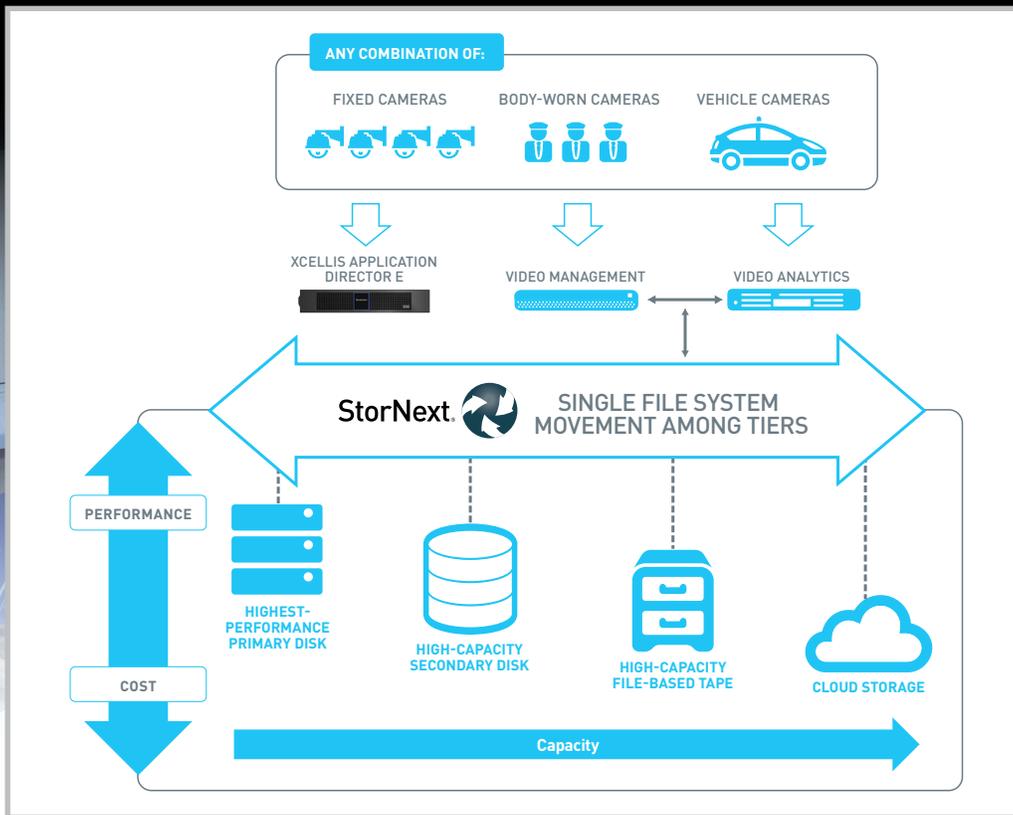

Many video surveillance environments require 24/7 video streaming, which demands a storage solution that can handle the massive amounts of data being produced. Quantum's video storage solutions can ingest large amounts of video files with ease, while also delivering streaming performance and real-time access to data.

STORE MORE. SPEND LESS.

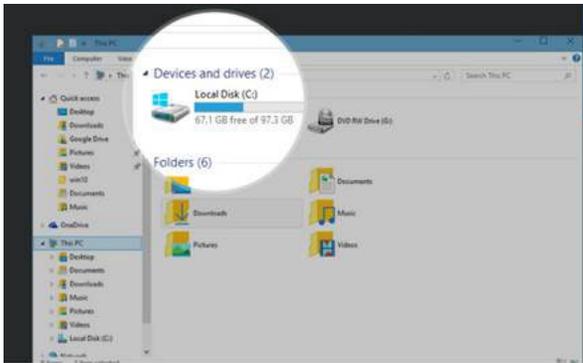

Tiering empowers the movement of less-frequently used data to the most cost-effective storage with best-in-class data integrity, allowing security professionals to spend less on storage and more on other tools in their workflow.

MULTI-TIER STORAGE: THE FOUNDATION FOR THE NEW VIDEO SURVEILLANCE & SECURITY INFRASTRUCTURE

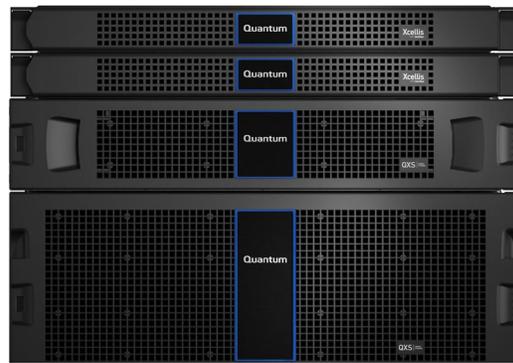

IMMEDIATE, DIRECT ACCESS TO DATA

No matter what tier of storage your file resides—whether it's high-performance primary disk, high-capacity secondary disk, file-based tape, or cloud—it appears as one single file system that's as easy as clicking on a document on your C: drive.

STORAGE BUILT FOR THE CHALLENGES OF VIDEO SURVEILLANCE

Quantum's multi-tier storage solutions enable security professionals to scale their infrastructure without compromising performance, access, or cost. We help you design and implement a storage solution that puts your data in the right place, at the right time.

ABOUT QUANTUM

Quantum is a leading expert in scale-out tiered storage, archive, and data protection. The company's data management platform and tiered storage approach provide a unique combination of high performance, low-cost capacity, and easy access that enables security and law enforcement professionals to address the challenges created by more cameras, higher resolutions, and increasingly sophisticated analytics.
