FEE-BASED INSTRUCTOR-LED TRAINING

In addition to the free resources, you can purchase additional training. Talk with your sales contact.

Getting to Know Your Product:

Live, Virtual Training – Presented Via WebEx

If you want a short product introduction (~4 hr) and the opportunity to ask questions throughout the training, consider this option. These sessions are hosted by product experts and allow you to attend sessions remotely via WebEx, reducing travel expenses but still allowing you to participate in a live discussion.

You will be provided links to resources you can reference later. You will also receive a certificate of completion.

StorNext:

Classroom Training – Taught at a Quantum Location or Remotely

We have multi-day, hands-on training sessions if you need StorNext File System only, and sessions if you need StorNext File System and Storage Manager.

These sessions can be taught at a Quantum Training Facility in Englewood, Colorado or in Munich, Germany. If class timing or location is not convenient, you have the option of selecting a class that is taught remotely as a virtual classroom.

All options include the same content, and you get your own virtual environment to practice key configuration and administration tasks using the StorNext GUI and command line interface (CLI).

With an additional travel surcharge, instructor-led training can also be taught on site at the customer's location.

Custom StorNext:

Classroom Training – Taught at Customer Location, a Quantum Location, or Remotely

If none of the above options meet your need, custom training is an option. In this case, make sure that you and your sales representative meet with the training team prior to purchasing custom training to ensure that the training goals are understood and the number of days are quoted properly.
